Technical Skills

- Data Entry & Database Mgmt
- Computer Troubleshooting
- IT Helpdesk Support
- Microsoft Excel
- Microsoft Word
- Microsoft PowerPoint
- Operating Systems
- Basic Networking
- Information Systems

Professional Skills

- Problem Solving
- Structured Communication
- Team Collaboration
- Time Management
- Attention to Detail
- Adaptability
- Administrative Coordination

Languages

Arabic

Native / Mother Tongue
Flawless native command, formal literary composition, and technical vocabulary.

English

Good Professional Command
Excellent reading comprehension, conversational fluency, and professional email correspondence.

EZZAT ABDEEN ABDELRAHMAN AHMED

Management Information Systems (MIS) Graduate

IT Support • Data Entry • HR Operations

Profile

An ambitious Management Information Systems (MIS) graduate with a strong foundation in Information Technology, Data Operations, Human Resources processes, and Business Administration workflows. Skilled in technical troubleshooting, structured data management, Microsoft Office productivity tools, and organizational support functions.

Combining analytical thinking with attention to detail, I excel at maintaining accurate records, supporting end users, optimizing workflows, and contributing to operational efficiency. Passionate about continuous learning and professional growth, I am prepared to contribute effectively within IT Support, Data Entry, HR Administration, and Information Systems environments.

Education & Academic Focus

B.Sc. in Management Information Systems (MIS)
Sohag Higher Institute for E-Commerce

May 2025
Very Good — 83.48%

Academic Focus Areas

- Information Systems
- Human Resource Management
- Systems Analysis & Design
- Database Management
- Computer Networks
- Decision Support Systems

Academic Experience & Practical Exposure

Data Management

Conducted structured data entry exercises and database administration tasks, applying normalization principles and query operations to maintain data integrity across academic project environments.

Technical Troubleshooting

Diagnosed and resolved hardware, software, and connectivity issues through systematic problem identification, applying IT helpdesk methodologies and technical documentation practices.

Administrative Operations

Supported administrative workflows including document preparation, scheduling coordination, and records filing using Microsoft Office suite to maintain organized and efficient operational records.

Human Resources Documentation

Developed understanding of HR information systems, employee record management, onboarding documentation, and personnel database administration aligned with organizational HR practices.

Microsoft Office Productivity Solutions

Produced data-driven reports, presentations, and analytical spreadsheets using Excel, Word, and PowerPoint to support academic deliverables and simulated organizational reporting.

Digital Records Management

Maintained structured digital filing systems, version control documentation, and information retrieval processes to support academic and administrative project requirements.

Graduation Capstone Project

Integrating Information Technology Helpdesk Interfaces with Administrative Management Systems

Designed a conceptual framework demonstrating how database systems and IT service desk platforms streamline administrative workflows, employee support operations, inventory tracking, and organizational communication processes. Documented integration architecture, data flow diagrams, and system design specifications to simulate a real-world enterprise environment.
